

## TCS Temperature Concentrator System Multi-Channel Transmitter

Model: **TCS**

The TCS Temperature Concentrator System Multi-Channel Transmitter acts as a temperature mux and substantially reduces the cost of transmitting multiple temperature sensor measurements in general purpose and hazardous area applications by concentrating up to 32 signals onto one digital network. TCS system modules include: TCM, and HMC or HES. The TCS supports MODBUS RTU utilizing the HMC and supports MODBUS/TCP and HART-IP with use of HES.
