LH2 Explosion-Proof/Flameproof Connection Head for Head-Mount Transmitters and Terminal Blocks

Model: LH2 Explosion Proof Flameproof Connection Head

The LH2 connection head is ideal for use in hazardous locations with head-mount transmitters and terminal blocks used for sensor wire terminations. This housing is certified for use in explosion-proof and flame proof areas and is resistant to ultraviolet rays and corrosive chemicals and features a locking cover safety mechanism. LH2 models further meet standards for enclosing indoor and outdoor electronic instruments that are approved for use in Intrinsically-Safe and Non-Incendive locations.

Product Details

Housing/Enclosure Approval/Rating	Explosion-proof/Flameproof
Housing/Enclosure Type	For hockey puck instruments
Housing/Enclosure Cover Type	Solid cover
RoHS Compliant	Yes
